P.T. TRAVELS ABROAD

October, 2009

Industrial Safety and Rehabilitation Institute and ISR Physical Therapy are happy to announce that Trevor Bardarson PT, OCS, a local physical therapist from the Houma area, will be traveling to Kazakhstan and Kuwait on behalf of Chevron Corporation for the month of October. He has been chosen to assist Chevron in their Global Fitness for Duty process. This process assists Chevron in correctly matching the physical abilities of employees to the physical requirements of the job. "I have been fortunate to have been chosen to assist in the process" says Mr. Bardarson. "I perform an analysis of the physical demands of individual positions within Chevron and that information is used to ensure correct matching of employees to the jobs. Using this process we were able to demonstrate a cost saving for Chevron of \$7.00 for every \$1.00 spent in the analysis and employee testing process as well as improve employee safety. We presented these findings at the Society of Petroleum Engineers Conference in Nice France last year." Also involved in this process is Richard Bunch PhD PT, a Houma native. "We are very pleased to have Mr. Bardarson represent Industrial Safety and Rehabilitation and ISR Physical therapy in this global process. Mr. Bardarson and I have worked with Chevron for the past 14 years assisting in the development of this system and we are excited to see it rolled out on a global scale." states Dr. Bunch. Richard Bunch and Trevor Bardarson are physical therapists with locations in Houma and New Orleans. They also manage a network of 136 clinics in 26 different states that perform the functional tests they design for companies. They are both qualified as experts in physical therapy, ergonomics and functional testing in Federal, State and Workers Compensation courts."
